

## Internship - Frontend Dev. (JavaScript) + Server management

### About Us:

**Chronodox** is a young and innovative tech startup that develops a new kind of task-management solution for the **B2B** sector. Join us now on our path to **changing how task-management is done today** and get your chance to **significantly influence the development work** of a promising startup in Berlin!

If you are looking for a real challenge and you want to refine your skills – join us! We are looking for a Front-end Developer, part- or full-time, to join us for 2-6 months, starting asap.

### Responsibilities:

- Help to develop our software
- Help to maintain the Linux servers and databases
- Work closely with the rest of the team

### Requirements:

- JavaScript, HTML5 and CSS knowledge, building web applications
- Experience in Linux, or any \*nix platform
- Knowledge in SQL databases (MySQL is an advantage)
- Enthusiasm for coding and learning
- Fluent in English

### What we offer:

- Flexible conditions on the duration of the internship
- Work with our creative and international team in a great atmosphere
- Gain substantial hands-on experience and learn from our very experienced developer
- Lots of freedom to influence your day-to-day work
- Live & work in Berlin – Europe's new startup melting pot
